

 **TOYOTA**
PASSION TO LEAD

TAKE REFINEMENT...

The new
LAND CRUISER PRADO

INTRODUCTION

The SUV that blends refined design with intelligent performance. Welcome to driving pleasure that delivers a new level of freedom with a greater degree of sophistication. Master the toughest terrain with confidence and command the city with style. Test drive it to believe it.

...EVERYWHERE

REFINED STYLING FOR AN URBAN STAGE

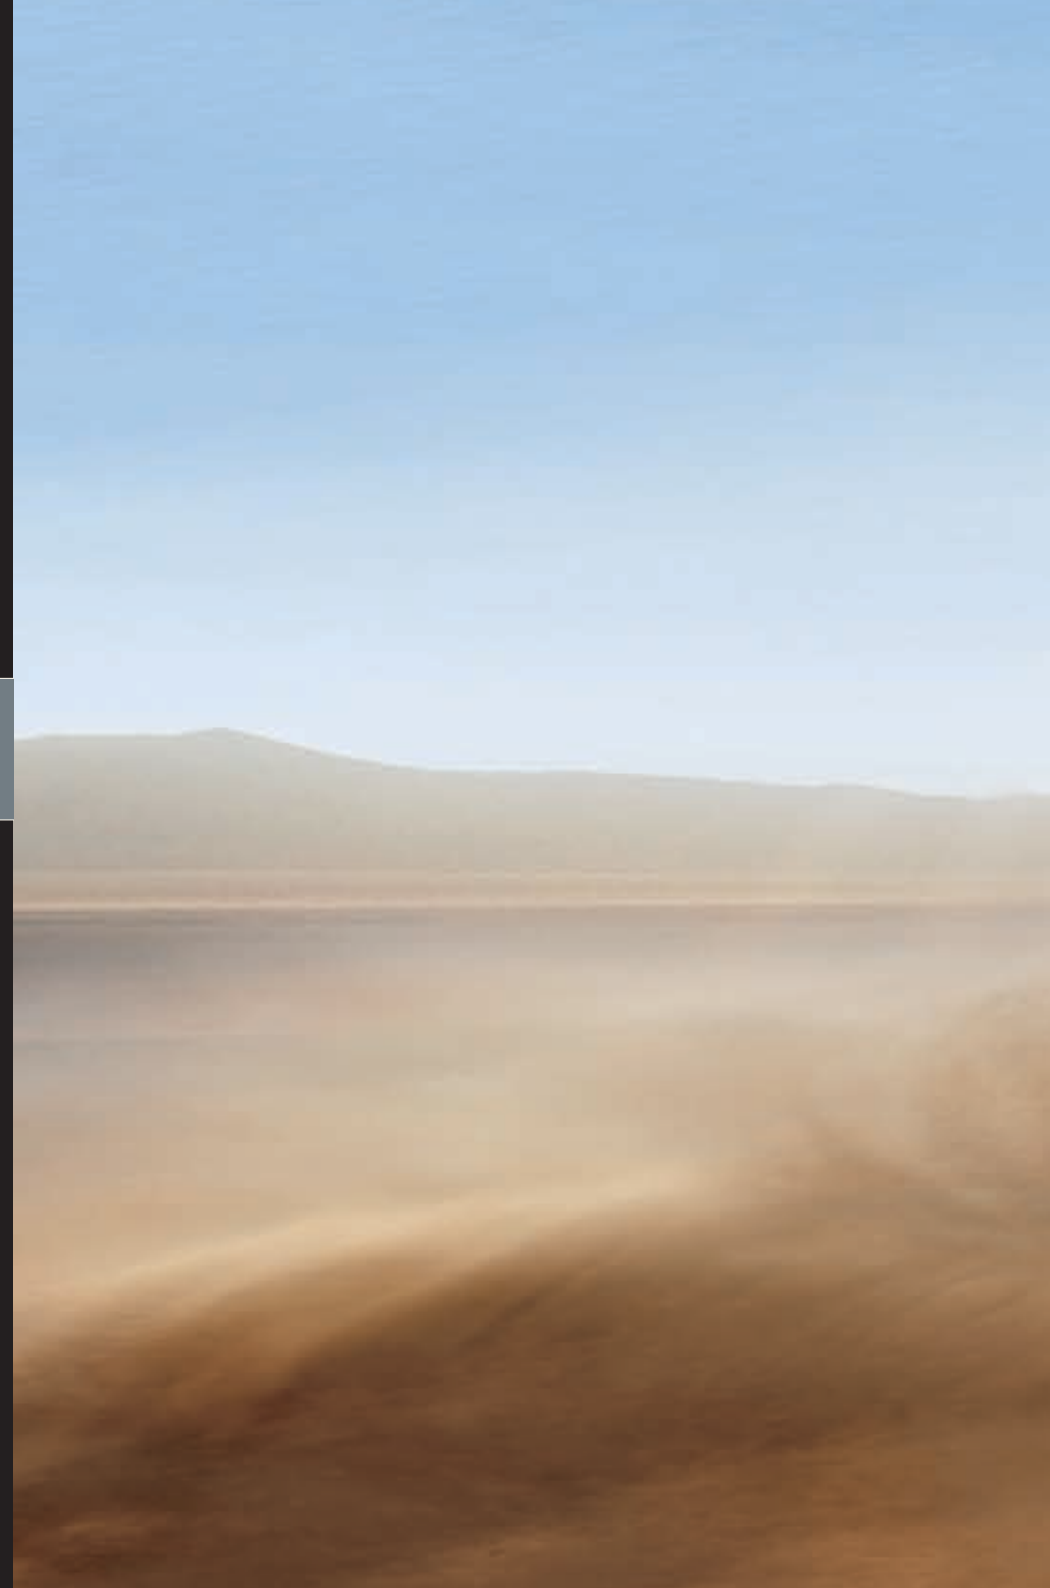

With the rugged strength of an off-road leader, and an exterior design that achieves the summit of refinement, Prado has a distinctive individuality that harmonizes magnificently with urban life.

A NATURALLY DYNAMIC PRESENCE

With its 4WD heritage evident in every aspect of its powerful and commanding exterior design, Prado's naturally dynamic presence really shines in rough terrain.

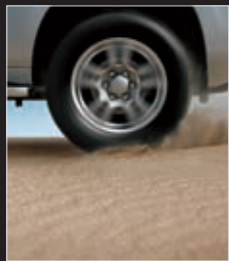

LAND CRUISER PRADO

LAND CRUISER PRADO

INNOVATIONS FOR OFF-ROAD PERFORMANCE

Whether you're an experienced off-roader or a first-time explorer, Prado incorporates numerous innovative technologies to support off-road driving and provides you with a superlative driving experience.

MULTI-TERRAIN SELECT

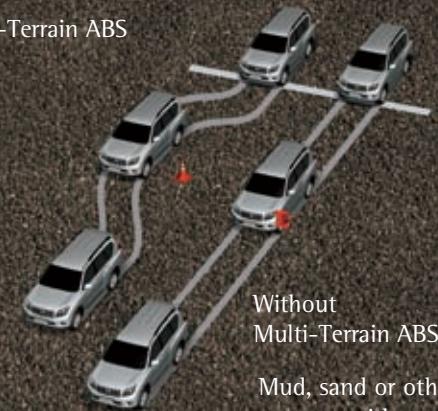

For Optimum Driving according to Off-road Conditions

By choosing one of the four drive modes offered by the multi-information switch on the steering wheel, this revolutionary system lets you obtain the optimum traction you need to handle slippery surfaces like mud/sand and loose rock, or non-slippery surfaces like mogul and rock. So even if you're not an experienced off-road driver, you can enjoy secure, sure-footed control when travelling over rough terrain.

MULTI-TERRAIN ANTI-LOCK BRAKING SYSTEM WITH ELECTRONIC BRAKE-FORCE DISTRIBUTION

Multi-terrain ABS operates in synch with Multi-Terrain Select, automatically regulating ABS operation to suit off-road driving conditions such as mud and sand. With normal ABS activated in on-road driving, EBD helps provide balanced braking regardless of the occupant/cargo load.

With
Multi-Terrain ABS

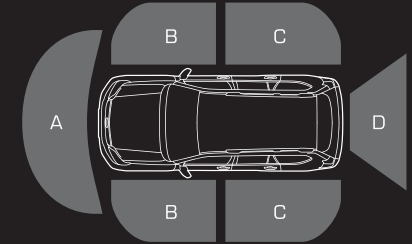

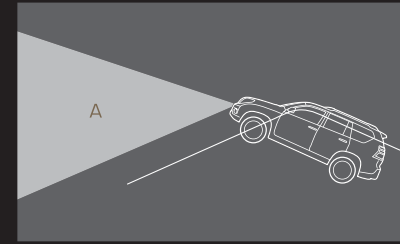

Without
Multi-Terrain ABS

Mud, sand or other surface
with poor traction

Forward view

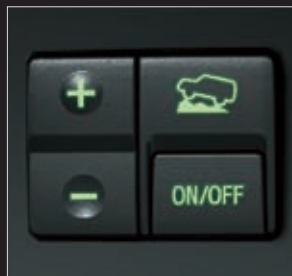

Camera range: A. Front B. Front-side (Left/Right) C. Rear-side (Left/Right) D. Rear

Four cameras, mounted on the front, rear, and sides of the vehicle, enable the Multi-terrain Monitor to display six different views of the terrain outside. The system supports you by enabling you to see the surrounding conditions even when cresting a hill or driving on extremely uneven ground that makes it difficult to see the terrain directly. Switching between the various views is easily effected via the multi-information switch. On the forward view, on-screen indicators show the current direction of travel.

Steering Angle Display

The multi-information display also shows the vehicle's wheel angle in real time, enabling visual confirmation of steering direction to help you stay on track and out of trouble.

Crawl Control <5-speed>

Crawl Control provides optimal throttle and brake control, maintaining a constant low speed to support safe, sure driving on sand, dirt, rock, mud, steep grades, or other surfaces that require fine accelerator control. Five speeds are offered, with fully automatic throttle and brake control that frees you to concentrate on steering the vehicle.

A ROBUST AND SUPERIOR RIDE

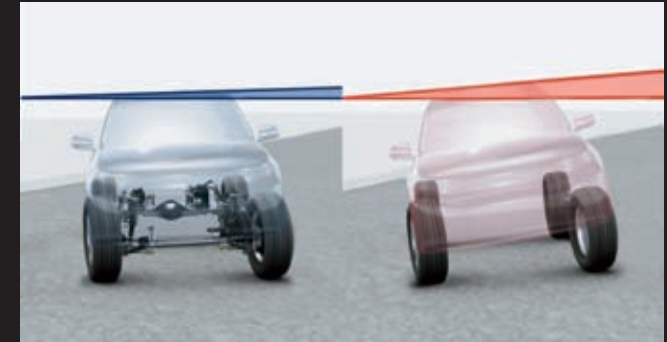

On road or off road, Prado's advanced suspension system and frame structure assure outstanding performance that will exceed your expectations.

Electronically Controlled Kinetic Dynamic Suspension System: For Outstanding Drivability Off-road and a Comfortable Ride On-road

Off-road Driving

All tyres are kept firmly in contact with the ground even when travelling over rocks and other demanding surfaces, so you enjoy a safe, stable ride with excellent traction for superior rough-terrain drivability and control.

On-road Driving

Body roll is suppressed, so you get superior steering stability and a steady ride when cornering. In addition, vibration is effectively absorbed through fine electronic control even when travelling on slightly uneven surfaces, realizing a sufficiently comfortable ride.

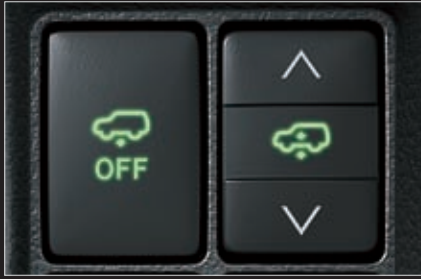

Variable Flow Control Power Steering

Optimal steering force is achieved by varying the hydraulic power steering pump flow rate according to vehicle speed and steering input speed. So steering is light and nimble at low speed for easy manoeuvrability and parking, and firm and responsive at high speed for enhanced control and stability. In addition, fuel efficiency is improved by reducing hydraulic power steering pump flow rate when no steering movement is required.

Prado Frame

The rigidity, strength and durability of the Prado frame have been advanced by reinforcing the frame cross-section to secure superior torsional and flexural rigidity. (KDSS frame shown)

Electronically Modulated Rear Air Suspension plus Adaptive Variable Suspension System

Electronically modulated rear air suspension maintains a constant vehicle height irrespective of the number of occupants or amount of cargo. Height is adjustable by switch operation. Additionally, AVS regulates the damping force of the shock absorbers according to driver input and road conditions. A choice of Comfort, Normal, and Sports modes is offered.

Full-time 4WD System with Torsen Limited Slip Differential

An easy-to-use dial-type transfer switch lets you shift smoothly between low-range and high-range drive. There are also different lock switches that let you lock the centre and rear differentials.

AN OPTIMUM BALANCE OF
POWER AND EFFICIENCY

4.0L V6 Petrol Engine 1GR-FE

Newly introduced Dual VVT-i and a roller-rocker arm offer fully variable, unstepped control over intake and exhaust valve timing, with high torque and output, excellent fuel efficiency, and low exhaust emissions across the entire rpm range. The result is a powerful and responsive driving experience that lives up to the Prado heritage.

2.7L L4 Petrol Engine 2TR-FE

Exhilarating driving performance with class-leading acceleration smoothness and reduced vibration for higher fuel efficiency.

3.0L L4 Diesel Engine 1KD-FTV

Prado is now available with a new common-rail turbo diesel engine that offers low emissions with class-leading power and fuel efficiency.

3.0L L4 Diesel Engine 5L-E

Power you can count on, with plenty of torque for satisfying response with performance to spare.

5-Speed Super-Intelligent ECT

Sporty and smooth-shifting multi-mode sequential 5-speed Super-Intelligent ECT also features AI-SHIFT, which automatically switches patterns according to road conditions and driver intent.

COMFORTABLE AND SPACIOUS IN EVERY DIMENSION

Prado's distinctively comfortable and spacious cabin assures the satisfaction of all on board.

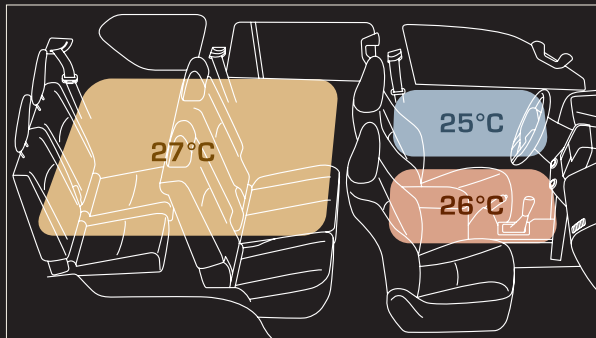

SOPHISTICATION WITH
A PRACTICAL PURPOSE

MAXIMUM COMFORT FOR ALL ABOARD

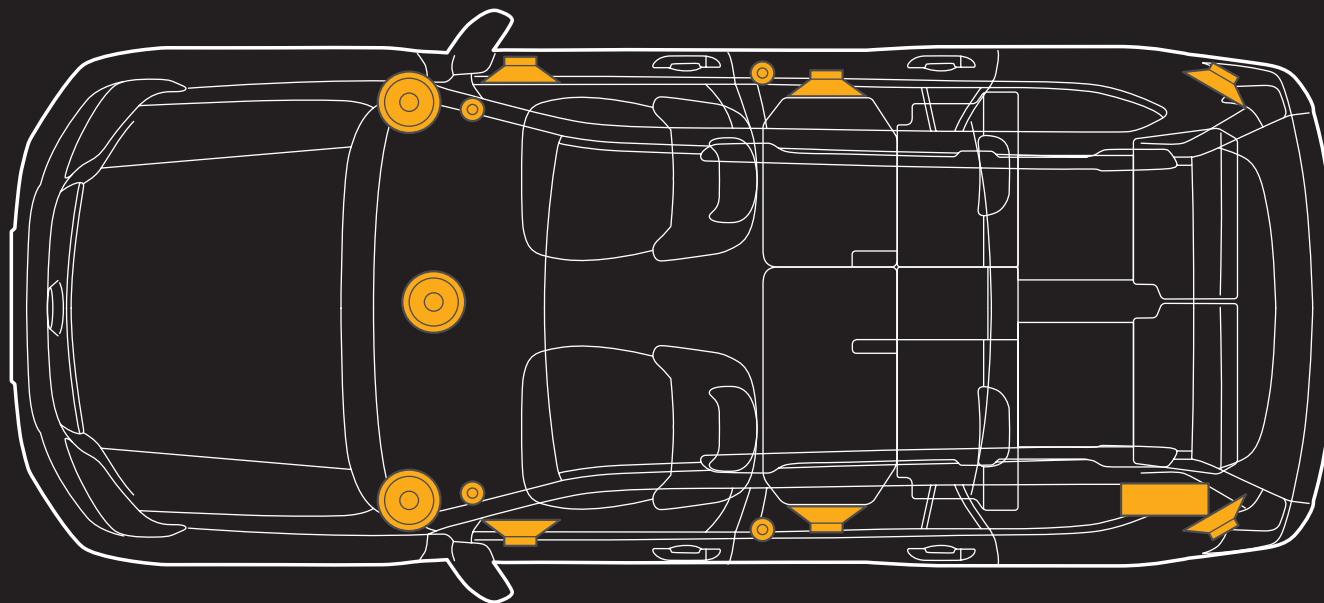

Superior comfort and convenience for everyone aboard is assured by a range of thoughtful amenities throughout the cabin.

Air Conditioning

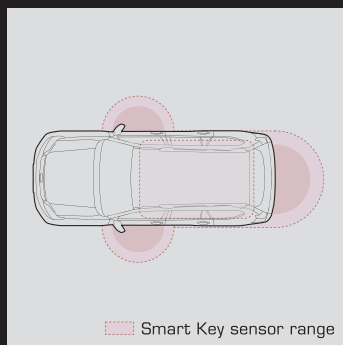

Fully automatic air conditioning offers 3-zone independent temperature adjustment (driver's seat, front passenger seat, rear seats). A pollen removal mode also helps reduce pollen and fine dust in the cabin, while the independent rear seat temperature controls enable everyone aboard to be more comfortable.

EMV-type 17-speaker JBL Synthesis Premium Surround Sound System

The best listening environment for every passenger. 17-speaker, 11-channel, 605-watt Digital Signal Processing (DSP) amplifier employs proprietary JBL Synthesis signal processing to produce an enveloping, emotional 7.1-channel surround sound experience in every seating position. Bluetooth hands-free phone capability is also available.

Smart Entry & Start System

With the Smart Key, you can unlock and lock the doors just by touching a door handle, and you can start the general engine just by stepping on the brake and pressing the Start/Stop button.

Clearance Sonar (front + rear)

Displays a warning message on the multi-information display and beeps if an obstruction is detected. This makes parking easier.

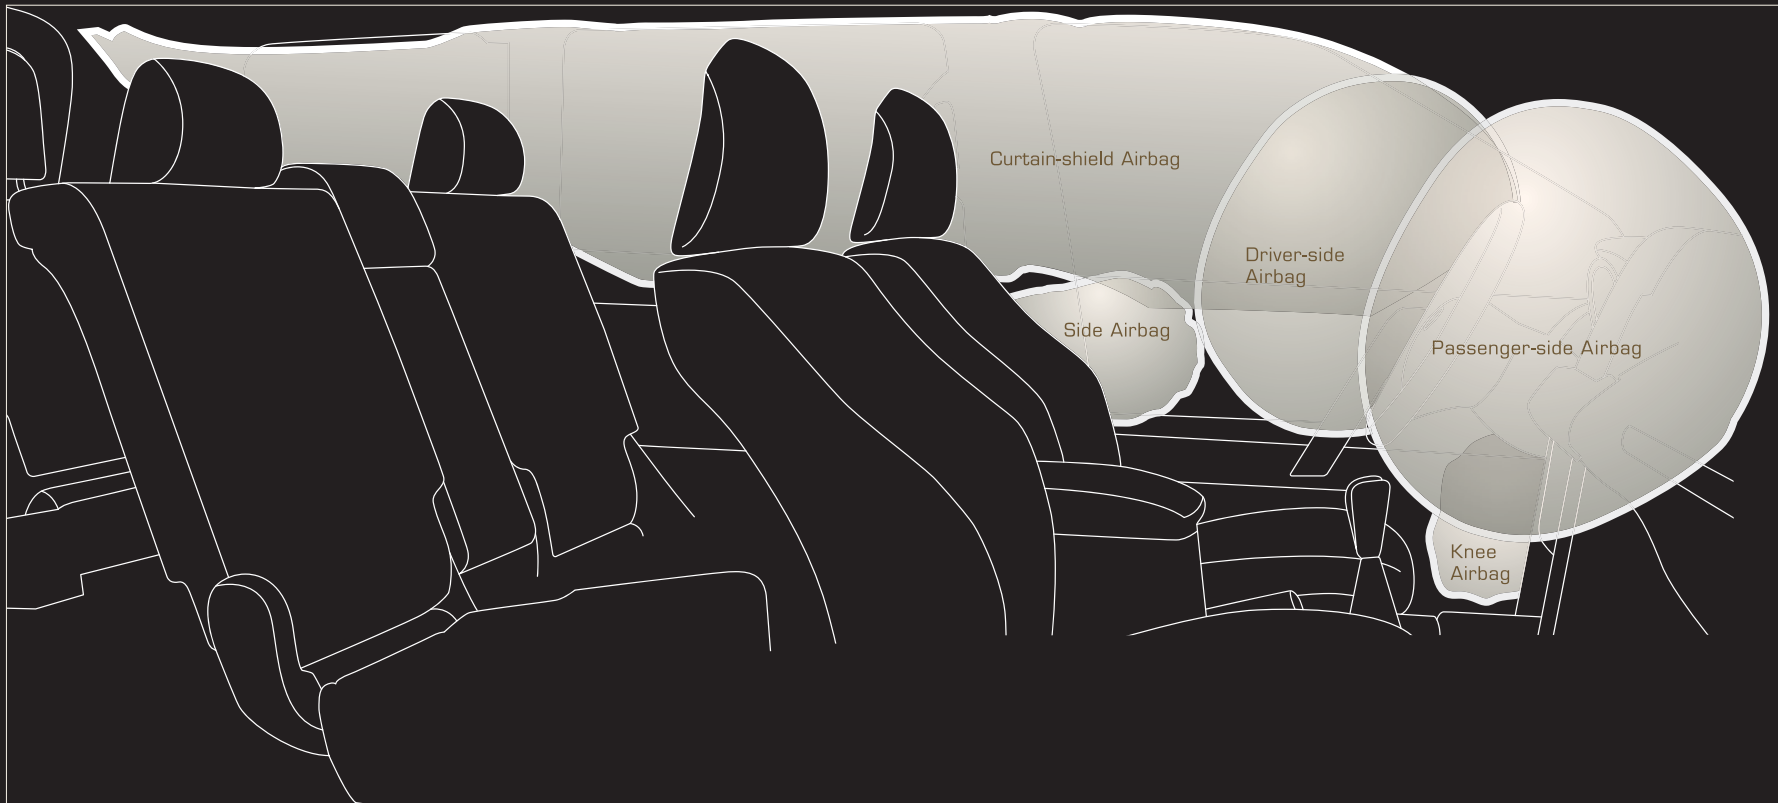

External Audio Input

Both a USB interface and an audio mini-jack are available for external audio input, enabling you to easily connect your own playback devices to enjoy your favourite music.

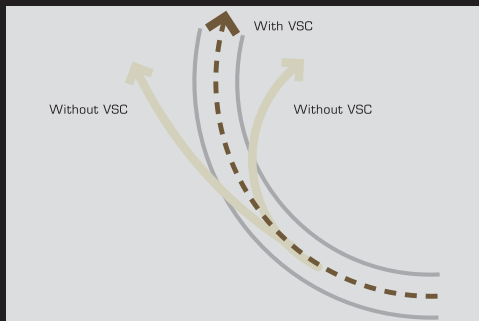

THE LEADING EDGE IN SAFETY

Advanced technologies for safety performance inspire your trust and peace of mind.

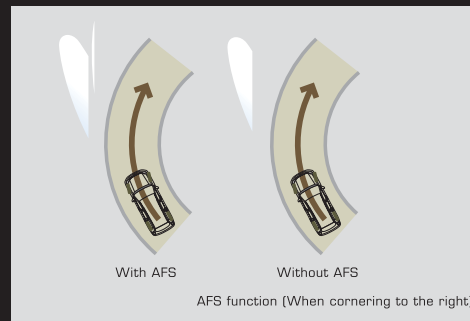

SRS AIRBAGS

SRS airbags contribute to driver and passenger safety by helping to minimize impact force in the event of a collision. Ample features include SRS curtain-shield airbags that cover all three rows, and an SRS knee airbag for the driver that bolsters protection by distributing and cushioning impact on the knees.

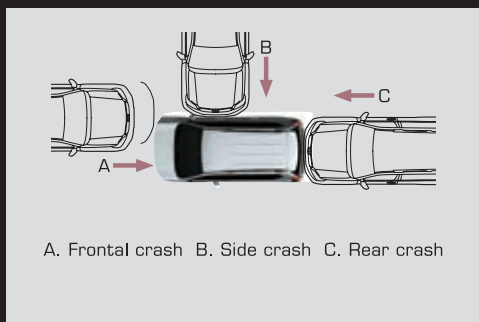

Vehicle Stability Control

When driving on slippery road surfaces, VSC enhances vehicle stability by controlling engine output by braking at each wheel if sensors detect an abrupt steering operation or lateral slipping of the vehicle.

Adaptive Front-Lighting System & High-intensity Discharge Lamps

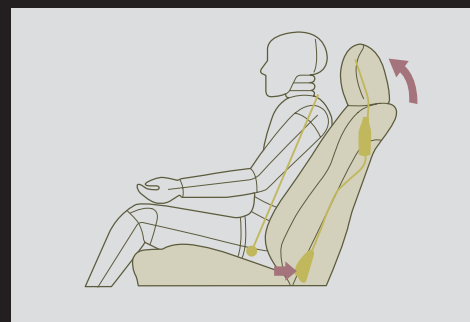

AFS effectively illuminates the road ahead by aiming the headlamps to the left or right in response to steering angle and vehicle speed.

Crash Safety

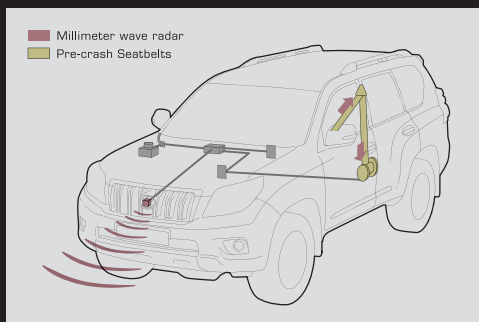

An energy-absorbing body structure contributes to a higher level of crash safety performance by effectively absorbing impact energy from the front, side, or rear.

A. Frontal crash B. Side crash C. Rear crash

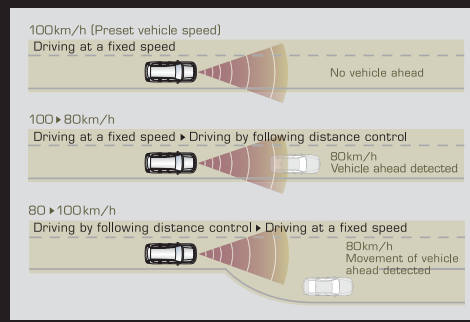

Active Headrests

In the event of rear-end collisions, front seats with active headrests contribute to reduction of neck impact by moving the headrest diagonally upwards to simultaneously cushion the head and back.

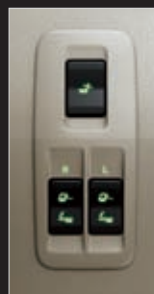

Dynamic Radar Cruise Control System

Dynamic Radar Cruise Control is an advanced system that enhances driving safety and convenience. When travelling at a preset cruising speed, it uses millimetre wave radar to detect and monitor the vehicle ahead, regulating speed as needed to maintain a driver-defined following distance (long, medium, or short), and returning to the preset cruising speed when it detects that the vehicle ahead has changed lanes.

Pre-crash Safety System

When a collision is judged imminent due to sensor detection of an obstacle on the road ahead, the system alerts the driver by beeping and displaying a warning message. If the driver performs emergency braking, Pre-crash Brake Assist is activated to bolster braking force. When the system judges a collision to be unavoidable, Pre-crash Brakes operate to reduce the speed of collision, and tension on Pre-crash Seatbelts is increased to contribute to higher occupant protection performance.

Power Seat Switches

Switches to the rear-right of the second-row seats and on the left-hand quarter trim side allow third-row 50:50 split seats to be retracted electrically for flush-with-floor storage.

Easy Access

Behind the front passenger seat, a lever on the second-row seat lets you quickly slide it to its forward limit, providing easy access to third-row seating.

Back Door Glass Hatch

For easy loading of shopping and other small items without opening the back door.

Accessory Socket

Provides 220V AC power for your travelling convenience.

Driver seat Memory Switches

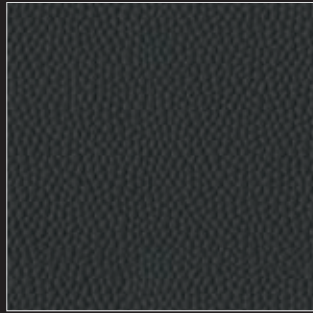

Remembers the preferred seating positions for up to two drivers.

ACCESSORIES

Dual Headrest DVD

Headrests upholstered to perfectly match the vehicle interior, and fitted with a 7" widescreen display and DVD mechanism. The headrests are conveniently located, optimize passenger comfort and create a premium appearance.

3M Protection Window Tints

3M Window Tints for your vehicle reduce heat, glare and also block out harmful UV rays. Choose from a complete selection of films from a variety of shades.

Genuine Leather Seats

High quality, rich leather upholstery that gives a distinctly well-appointed and luxurious feel to your Prado.
